## PROJECTS

[Live URL](#) | [GitHub](#) | [\[Netflix\]](#)

A web application inspired by Netflix, developed using React.js and Integrated with Firebase for user authentication. The project replicates the user interface and functionality of Netflix, allowing users to browse a collection of movies. Through this project, I gained hands-on experience in building a complex react application.

[Live URL](#) | [GitHub](#) | [Neumorphic Todo List](#)

A to-do-list application for study purpose. Users can effortlessly add tasks, can edit and update and can delete as well. It showcases the power of component-based development and state management for creating elegant responsive user interfaces.

HTML | CSS | React.js

[Live URL](#) | [GitHub](#) | [Store App](#)

An online store built using React and Redux, empowering users to seamlessly add items to their shopping cart. ReduxCart offers a smooth and intuitive shopping experience, allowing users to browse a wide selection of products effortlessly and add items to their cart with just a click.

[Live URL](#) | [GitHub](#) | [\[Rock-Paper-Scissor Game\]](#)

A fun project using JavaScript, for study purposes. Here you will compete with computers or you can say with JavaScript Math function.

HTML | CSS | JavaScript
